A European Utopia The theories of certain social reformers are to be seen in actual working in the little community of Klingenberg-on-the-Main in Germany. In the neighborhood of this town are valuable pits of fireproof clay, which the anthorities in days gone by were farsighted enough to retain as public property instead of allowing them to be owner erty instead of allowing them to be owned by individuals. They are worked by the municipality for the public benefit. The result is that Klingenberg is one of the hap-plest places in Europe. Not only do the profits on the clay suffice to cover all local and imperial taxation, but there is a con-siderable surplus, the bulk of which is divided among the inhabitants. HENRY MEYER, NAPOLEON,

General H. C. Hobart tells the following story: "In 1844 I went to Salem, Masa, the town where occurred the trials for witchcraft, to edit a newspaper. People in that day at Salem were more or less superstitious, and a story that was told me by some friends gave me a strong impression of the real power of imagination upon the human mind. I was assured that the story was true and that the victim was a well known man.

"He, with two friends, met one dark, rainy night in a drinking place in Salem, and the question of witcheraft naturally came up. The talk resulted in a wager that the bravest of the trio would not dare cross a vacant lot at the edge of the town proceed to the town burying ground, go into a vault where a prominent citizen had been buried that day and drive a nail in the coffin. The wager was taken, and the man started. The others proceeded to a point near enough to hear the driving of the nail and were soon rewarded by hear ing the sound proceeding from the tomb. They then returned to the tavern and waited for the return of the winner of the wager. An hour passed, and he did not come.
Becoming upease, they provided a least oming uneasy, they procured a lantern and going to the tomb made a horrible dis They found their friend lying cross the coffin in which he had driven the nati-dead. Investigation revealed the fact that he had sat down on the coffin while driving the nail and had accidentally driven the nail through his own coat When he undertook to rise, the fastened coat of course jerked him back and held him, and the awful feeling that a ghost had held him fast wrought up his feelings to such a pitch that he died of sheer fright."-Milwaukee Wisconsin.

"Some men," said ex-Senator Thomas M. Palmer of Michigan to me, "spend their entire time trying to get a public office and yet never succeed. Others do not lift a finger and appear to have offices thrust upon them. I suppose I belong to the latter class. I confess I am amazed myself when I look back over my public career. I have never been a candidate for any position, and yet I have held a great many. I was nominated and elected to the legislature of Michigan without my knowing how it happened. Next I was elected to the senate. Had not asked a man to vote for me and did not want to go to the senate. When my senatorial term expired, I declined to be a candidate for re-election. I said to my wife, 'Now we will have peace, and I shall devote the balance of my life to you.' I was engaged in packing up our household things to return to Michigan. There was a ring at the telephone. I answered it. 'Harrison has just sent in your name for minister to Spain,' was the message that came from Senator Manderson, 'Great Scott,' I ap

I landed in New York just a year and four days from the time of my departure. I am surely out now, I thought, but before I got settled down at home Mr. Harrison named me for president of the World's fair commission. The pressure was so strong I could not refuse it. When the Chrysolite was commission ed at Portsmouth for the China station, Captain Bellamy took a house at Hong-Kong, and in due course Mrs. Bellamy and her only daughter, Violet, followed him thither. In the second year of the commission the Chrysolite was at Hong-Kong for several successive months, and during that period the ladies came on board nearly every day. There were picnics on shore and water parties affoat, and if not on the Chrysolite then in the house, or in the boats, or on the various expeditions. His left log was smashed at the kne by a jingal ball, but around his thigh was a bluejacket's silk handkerchief, neatly applied in such a way that a nickel tobacco box placed beneath it effectively compressed the femoral artery and stopped the bleeding. It was well known that both box and handkerchief had belonged to James Larch, the captain's cexswain, whose dead body, with half a dozen bullets through it, was found on the enemy's side of the same wall. Captain Bellamy himself acknowledged from the first that he owed his life solely to Larch's devotion and skill. Yet the said. whole story has never yet been told. let Bellamy was then barely 18. In England she had led a somewhat dull

life, and at Hong-Kong she lost no time in redressing the balance of her existence, which was by no means dull there. It was not perhaps her fault that every officer of the garrison and of the squadron was either in love with her or was prepared to be, for she gave no special encouragement to any one. On the other hand, she discouraged no one. The larger the number of her admirers the greater was the enjoyment which she derived from the situation. Among them she was like a child in a room full of Some she damaged, some she smashed irretrievably, but without the slightest malice or wickedness. She simply had never realized the powers and responsibilities of a very pretty face and igure, supplemented by high spirits, untiring activity and abundant health, and although she spread ruin around her she never for an instant intended to do harm

His associations with her were, though n one sense, more distant and more

from the ship's boat to the shore, or vice versa, lest she might wet her feet. Her breath had fanned his face, her light form had rested in his arms, and while he never by word and seldom even by look betrayed his feelings he neverthe less steadfastly, and with all his being, worshiped her, Larch was a young and smart petty

officer. As such he had a promising career before him, and no doubt he would have been wise had he strictly minded his own business and endeavored to be content with the sphere in which it had pleased Providence to place him. But, like many of his betters, he went down before Violet Bellamy. It was at the beginning of the third

One morning the Chrysolite arrived off the place and sent in certain demands, which, unless complied with in three hours, were to be enforced by

means of the resources of civilization. The three hours elapsed, the demands were not granted, and with absolute panctuality the Chrysolite began to shell the fort from her 6 inch B. L. guns. The Chinamen laid low and did not reply with so much as a single shot. Mis-led by their silence, Captain Bellamy after dusk had fallen led ashore a much weaker landing party than he would have employed had he anticipated resistance. Not until the men had tumbled out of the boats did the enemy open fire, and then the captain knew he had made a mistake. He still hoped that he might avert disaster by rushing the fort, and he made the attempt; but, as has been already shown, he failed and fell. His men surged past him for a few yards, but were then repulsed and driven back pellmell. In the confusion and darkness they missed him and he was left lying, with his left knee mangled, to bleed to death or to get a speedier quietus from one of the many buliets that were whistling after the retreating

bluejackets.
It is astonishing that he escaped being hit a second time, for not only were the Chinamen firing with rifles from the fort, but the men in the boats were using their machine guns. In five minutes, though, the worst of the storm had passed away, and with the Iull Captain Bellamy saw a dark figure slowly drawing near him from the right. He fully expected to find that his visitor was one of the enemy armed with a mission to put an end to him, or perhaps drag him into the fort, where death might be administered a little at a time, and though a brave man he was much relieved when he was able to distinguish that the newcomer

was one of his own people.
"Beg pardon, sir, I hoped it was you," whispered a voice, which the captain at once recognized at that of his coxswain. "Hoped?" growled the captain. "What do you mean by hoping, you scoundrel? Here I am with my knee smashed, bleed-

ing to death!" "Sad news for Miss Violet," muttered

Larch. "Confound Miss Violet and you too! Bear a hand here and pull me out of this if you can. The beggars will be blazing

The coxswain made no reply, but dragged himself on, yard by yard, until at length he gently deposited his load behind the thick stone shelter. As he made a motion as if to return whence he had come the captain cried: "Stay in here, you idiot. Where the dickens are you going?"

Of all tactless men, perhaps the man most noted for this shortcoming was the late Lord Derby, who, notwithstanding his extraordinary talent, his remarkable common sense and sagacity, lived and ured, disappoint stood and unpopular man. Lack of tact was likewise the distinguishing characteristic of that other clever English states man, Lord Sherbrooke, better known as "Rob Lowe " and it is likewise one of the drawbacks to the success of Signor Crispi, the present Italian premier. Thus, during the silver wedding festivities at Rome a year ago, finding himself face to face with the empress of Germany, who immedi-atley recognized him and extended her hand in the most gracious way, he showed in such a plain manner that he had no idea who on earth she could be, and that he considered her rather forward, that she was forced to mention her name before he could make up his mind to bow down and kiss the extended hand. On another oceasion, when his groom of the chambers had just announced Lord Dufferin and thrown open the folding doors leading into the office of the premier, Crispi, without attempting to rise from the armchair in which he was lounging, contented himself with airily waving his hand to the mbassador and bade him a negligent good morning, smiling pleasantly as he did so. The smile was not returned, and Lord Dufferin, with his everlass in his eye, stopped short on the thresho gazed steadfastly at Crisp!, with an ex-pression of mingled hauteur and surprise. The premier at last understood, and jump ing up in much confusion rushed toward the most tectful of all Queen Victoria's embassadors, overwhelming him with apologies for his "unintentional discourtesy. -New York Tribune.

Max O'Rell on Women. Whenever Max O'Rell opens his flattering lips on the subject of woman, feminine ears all over the world are pricked up. He has been lecturing about her lately and makes some pleasing international comparisons. He said that in the French household woman was queen; she led her husband, and be did not complain; she knew all his affairs. He consulted her about his investments-that was why wealth in France was so stable, because women were not speculative. She thor oughly understood the poetry of matrimo ny. In England a woman knew nothing f her busband's affairs, not as much a his clerk. The more he saw of American women the more deeply he was impressed with the conviction that they were totally unlike all other women. There were few women to be compared with them in the drawing room. None with whom men felt more at ease. They had beauty, but it was not equal to that of English women, but it was their intellectual qualities that were striking. From the age of 18 a girl was allowed almost every liberty—she took the rest. In Europe women let the men decide what was proper—in America they did it for themselves.
